

DIAGNOSE

- FPG ≥ 126 mg/dL or HbA1c $\geq 6.5\%$ on two occasions, or RPG ≥ 200 with symptoms

FIRST-LINE MANAGEMENT

- Metformin 500 mg once daily with dinner; up-titrate weekly to 500 mg twice daily as tolerated
- HbA1c $\geq 8.5\%$ at diagnosis: add Glimepiride 1 mg before breakfast
- Lifestyle counselling at every visit

MONITOR

- HbA1c every 3 months until at goal; annual creatinine and urine albumin

REFER

- Type 1 suspicion, pregnancy, eGFR < 30 , recurrent hypoglycemia
