

STANDARD TREATMENT WORKFLOW

Dengue Fever — OPD Management

Code: STW-GP-04
Version: 2024.2 · Effective: 2024-07-01

SUSPECT

- Fever + two of: headache, retro-orbital pain, myalgia, rash, leukopenia

WARNING SIGNS — ADMIT

- Persistent vomiting, abdominal pain, mucosal bleed
- Lethargy, hepatomegaly, rising haematocrit with falling platelets

OPD MANAGEMENT

- Paracetamol 500–650 mg every 6 h for fever (max 3 g/day); adequate oral fluids
- AVOID Ibuprofen, Diclofenac, Aspirin and all NSAIDs — bleeding risk
- Daily CBC from day 3 of illness

FOLLOW-UP

- Immediate return if any warning sign appears
